

Connect First Responder

Flexible Messaging Solution for First Aid & Emergency Responders

CONNECT FIRST RESPONDER is the next evolution of our market leading communications solution Connect, Connect First Responder is designed to provide easy to use instant communication with all first aid & emergency responder staff across the entire site.

Connect First Responder provides the facility with the ability to communicate with staff via alphanumeric smart receivers from desktop PC's & touch screen call points from any location within the facility.

Connect First Responder can send critical messages from emergency touch screen call points and PC's .

All messages can be sent to a predefined responder, responder groups such as first aid or fire marshals.

Touch Screen Call Points can be located in any area and each unit can be configured with up to 6 on screen call buttons which can be configured with their individual label & message and individual button can be configured to send messages to required recipient or group of recipients. Touch screens can be wall mounted or desk mounted with a desk stand.

All messages sent using the system are logged and reports are available showing full details of messages sent along with date and time.
