

Paging & Messaging Software for Education

Send messages to pagers, mobile phones & email

CONNECT LTM is the next evolution of our market leading communications solution **Connect**, **Connect LTM** is designed to provide easy to use instant communication with all staff across the site.

Connect LTM provides the facility with the ability to communicate with staff via alphanumeric pagers from any PC within the facility.

Connect LTM can send messages to alphanumeric pagers, email and with the SMS option to mobile phones. With options for single or multiple desktop users and a customised desktop for each user **Connect LTM** is designed to offer the ultimate messaging platform for schools, colleges & universities.

All message recipients are displayed either individually or with a quick dropdown menu in predefined groups and messages can be sent to groups of recipients and individuals.

Each desktop user can have their own quick messages available from the quick message menu along with their own customised users and groups.

All messages sent using the system are logged and reports are available showing full details of messages sent along with date and time.

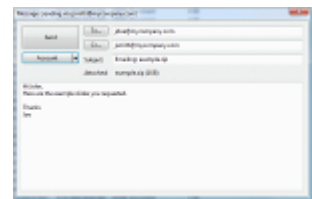

System Features

- Flexible options, available for single or multiple PC's.
- Organise recipients in to groups for instant bulk messaging.
- Send messages to onsite pagers at no cost with options for email and SMS text to mobile phones.
