First Aid V3 Alpha Call System

Alert First Aid Staff with Instant Messaging

The First Aid v3 Alpha System will transform the way you alert your first aid responders.

The First Aid V3 Alpha Paging System provides instant communication with full alphanumeric messages.

First Aid V3 Alpha ensures that first aid responders can be alerted at the press of a button.

A simple press of the call button on the Staff Call transmitter instantly alerts staff with vibrate or bleep sending full alphanumeric messages. Communicating the area calling and the alert type.

With up to 30 pre-set messages pre-programmed in to the transmitter all first aid scenarios can be covered.

First Aid V3 Alpha paging saves valuable time and keeps your responders contactable without the need for complex expensive systems.

All pre-set messages can be programmed in to the transmitter and changed should the need arise.

V3 Alpha Pagers are rechargeable ensuring devices are charged to the optimum level and providing constant communication.
