

iFlex DriverPage

Smart Loading Bay Driver Call System

iFlex DriverPage is the next generation of call system to alert drivers waiting for an available loading bay.

Options for stand alone or networked systems with touch screen call points.

See at a glance all vehicles waiting for loading bays on the intuitive iFlex touch screen.

When vehicles arrive enter their registration number on to the iFlex DriverPage system and issue a DriverPage Matrix pager. When a loading bay is available simply touch the vehicle registration on screen and enter the bay number and the drivers pager is alerted showing the loading bay number to attend.

iFlex DriverPage can be used with multiple call points & touch screens, the networked system allows vehicles to be entered on to the system at one call point and called from another location.

iFlex DriverPage Saves Time and Money — With iFlex DriverPage you never have to spend time searching for drivers and vehicles. iFlex DriverPage allows vehicles to be parked in a safe secure zone and for the driver to be alerted with the bay number when required.
