

Cleaning guest pagers to protect your customers & staff

We are seeing increased use of our customer pager range to help maintain social distancing but still provide an excellent customer experience during the pandemic.

Protecting your staff & customers from transfer of infection during the Covid-19 pandemic is very important.

Pagers supplied by Pager Call Systems are manufactured using antibacterial additives.

Regular cleaning of pagers should become part of your cleaning regime.

Customer pagers should be cleaned after each use, clean customer pagers with a cloth and sanitiser liquid formulated to WHO guidelines.

Alternatively customer pagers can be cleaned using Clinell Antimicrobial Wipes.

Provided operators maintain a strict cleaning protocol all customer pagers will be safe to use.

Step By Step Cleaning Guide

1. Familiarise your staff with the sanitising requirements for using customer pagers
2. Ensure staff issuing customer pagers are maintaining a strict hand cleaning regime.
3. Hand the pager to a customer and explain your process for calling them.
4. When the pager is returned wipe all surfaces with a cleaning cloth & alcohol based sanitiser or Clinell antimicrobial wipes
5. Return the pager to the charge base ready for next use.
6. Pagers supplied by Pager Call Systems have the added benefit of antimicrobial additives in the plastics to help with infection control
