

Quiet Call CP Networked

Quiet Call Networked Patient Call System

Transform patients waiting experience with Quiet Call Networked Systems

Free patients from the confines of the waiting room, patients can relax in the facilities cafeteria or step outside for some fresh air safe in the knowledge that they will be called the moment they are required for their appointment. No more congested waiting areas, relieve the stress of waiting for patients and free staff time to be more productive.

Quiet Call CP Networked Patient Call offers discrete communication with patient privacy guaranteed, no more calling patient names or searching the facility to find patients.

Quiet Call CP Networked Patient Call systems offer all the advantages of our Quiet Call Ultra system with the added advantage of network based call points and transmitters.

Quiet Call CP Networked Patient Call is the ideal solution for locations requiring patient call systems in multiple departments.

Quiet Call CP Networked systems provide message delivered notifications on screen to confirm patients have been called, this function is unique to Quiet Call CP Networked systems.

Quiet Call CP Networked systems can cover even the largest sites efficiently with no black spots or non call areas.
